With the optional tracking generator, users can quickly and easily measure frequency response, filters and attenuation. The "n dB down" marker determines the 3 dB bandwidth of a bandpass filter at the press of a button.

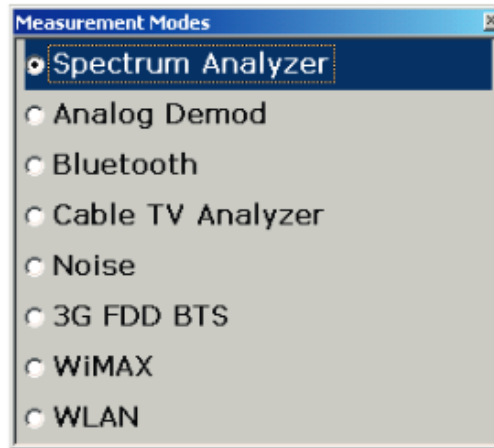

¹⁾ For reflection measurement, an external VSWR bridge is required.

Use as power meter

Turn the R&S®FSL into a power meter with R&S®NRP power sensors and the R&S®FSL-K9 option.

Many predefined measurements

The R&S®FSL offers many different firmware options. The user can switch between different applications.
